About Our Service:

ai in supply chain

Drive smarter supply chain performance with Throughput Inc! We harness the power of AI in supply chain to optimize procurement, production planning, inventory management, and delivery. Our intelligent systems predict demand, reduce waste, and enable data-driven decision-making. Stay resilient and responsive in volatile markets with end-to-end visibility and automation. Let Throughput Inc show you how AI in supply chain unlocks higher efficiency and agility for your business. Schedule a demo to learn more!

About Our Service:

scor supply chain

Boost your performance using the SCOR Supply Chain framework at Throughput Inc. We specialize in applying the SCOR Supply Chain model to enhance process efficiency, set KPIs, and track improvements across planning, sourcing, and delivery. Throughput Inc's approach ensures streamlined operations with real-time visibility. Maximize efficiency and reduce waste through standardized processes.

About Our Service:

 ai in supply chain

Accelerate operations with AI in Supply Chain solutions from Throughput Inc. Our cutting-edge tools use artificial intelligence to predict demand, manage inventory, and optimize logistics. AI in Supply Chain enables smarter decision-making and reduces errors by learning from real-time data. Throughput Inc ensures your supply chain is agile, responsive, and cost-effective with AI-driven insights. Stay ahead of the competition by integrating advanced AI in Supply Chain systems tailored to your business needs.

About Our Service:

demand sensing solutions

Transform forecasting with Throughput Inc's demand sensing solutions. Our platform uses machine learning to provide accurate, real-time predictions for sales and inventory planning. Demand sensing solutions enable you to respond quickly to changing market trends, reduce inventory waste, and improve fulfillment rates. Whether you're in retail or manufacturing, Throughput Inc helps align supply with demand like never before.
