

Rennover

Rennover started on September 23, 2020, inspired by Brazil's rich art and culture. With over 14 years of design experience, we turn old wooden pallets into eco-friendly furniture. Each piece is handmade with care, built to last, and made to look good in any space. We believe in protecting the planet, sparking creativity, and bringing people together through thoughtful design. At Rennover, we create furniture that's not just useful, but meaningful.
